INSPIRING THE WORLD FROM BARCELONA

CUPRA (short for CUP RAcing) emerged in the 1980's through the motorsport division of Spanish brand SEAT, which competed successfully in World Rally and World Touring Car Championships. The CUPRA nameplate first began appearing in 1996 on selected performance models before growing in popularity such that in 2018 CUPRA became a stand-alone brand with dedicated variants of the Leon and Ateca, and ongoing success in a variety of motorsport categories. Soon thereafter, CUPRA-unique models were launched including the Formentor, Born, Tavascan, Terramar and soon the Raval, with worldwide sales surpassing one million vehicles in 2025.

As a proud member of the Volkswagen family alongside brands such as Porsche, Lamborghini, Audi and Skoda; CUPRA fuses the latest German engineering with edgy Spanish design and engaging dynamics to create vehicles that deliver an irrepressible impulse while driving, and a yearning to look back as you walk away.

In Australia, CUPRA launched in 2022 with unique Sales and Service 'Garages' in key hubs around the country. In a short space of time our Tribe has grown to over 10,000 obsessive enthusiasts who value the journey as much as the destination, and for whom blending-in just isn't in their DNA.

If this resonates with you, maybe you have a little bit of Spanish in you.

Maybe you're One Of Us.

Find out more.

CUPRA Tindaya concept model shown

THERE IS NO SECOND

There are moments when we might consider that being second is acceptable because the path of least resistance can seem so inviting. In the haze of uncertainty, it can feel like a safe harbour, a place where the stakes are lower and the pressure eases, a place of compromise. But deep down, no matter how hard we try to settle for that, we simply can't.

We are too obsessed with winning.

We are driven by an enduring passion that fuels every move, every decision. It courses through our veins like an unstoppable current. It's a fervour that refuses to be extinguished. And at this point, we wouldn't choose any other way.

We will continue breaking boundaries, defying limits, and challenging the challenger because we know that second place is not even an option.

This is our curse.

This is the price we have to pay.

VZ model shown in Dark Void with optional Sunroof

WHAT'S IN A NAME?

Designed and developed in Barcelona, Terramar means land (terra) and sea (mar), reflecting its connection to the coastal Spanish landscape and in particular the Autodromo de Sitges-Terramar racetrack. The steeply banked oval track was built in 1923 as one of the first racetracks in the world and is where CUPRA was first introduced to the general public in 2018.

"For some people, design follows functions, but for us, it follows emotions. In this sense, at CUPRA we've always been committed to inspiring the world from Barcelona, but with this model, which has 'terra' (land) and 'mar' (sea) in its name, we've taken it even further. The inspiration we get as designers does not only come from the amazing architecture and design spirit of Barcelona, it's also about the influence of the Mediterranean culture, full of life, and the strong character of its people. By combining it with our design philosophy, we've achieved a more authentic form of expression. Our aim was to emphasise the point where the land meets the raw, elemental power of the sea."
- Jorge Diez, CUPRA Design Director

Overseas Terramar model shown at the Autodromo de Sitges-Terramar racetrack

DESIGN

The CUPRA Terramar is a highly emotional and athletic SUV that embraces CUPRA's new DNA, delivering a vehicle that stands out from the crowd with distinctive styling.

EXTERIOR DESIGN

STRIKING STYLE

Unleash your daring side with CUPRA Terramar's bold, dynamic styling. This SUV embodies determination and audacity, radiating strength and ferocity from the shark-nose front, to the bold rims and the contrasting rear.

EMBRACE THE LIGHT

Stand out with iconic 3D infinite rear LED lights.
The illuminated CUPRA logo adds a sophisticated touch, making your presence undeniable. The Terramar name shines brightly in the side lights, rewarding those who are drawn to intricate details.
Completing the look, the contrasting rear diffuser gives the design a defiant character, emphasising the SUV's larger rear proportions.

VZ model shown in Dark Void with optional Sunroof & Performance Brakes Package

INTERIOR DESIGN

→

INNOVATIVE DRIVER-ORIENTATED INTERIOR

Immerse yourself in a cabin crafted for a real driving experience with the CUPRA Terramar's driver-oriented interior, featuring a stunning 12.9" infotainment system, Supersport steering wheel and a dashboard adorned with 3D parametric moulding and copper detailing.

←

IMMERSIVE ILLUMINATION

Get ready for an inspiring and refined driving experience.
The CUPRA Terramar's ambient lighting system features strategically placed LEDs that create a soothing or exhilarating glow across the dashboard and door panels.
The customisable palette includes Electrified, Boreal and Individual colour schemes to suit your mood, or program it to align with your chosen drive profile.

Overseas VZ model shown with Deep Burgundy interior

LIFESTYLE SUITED

Ferrying friends frequently?
The CUPRA Terramar's larger proportions are well suited with generous legroom and creature comforts including a centre armrest, USB charging ports, control of the rear climate and customisable ambient door lighting.

MASTER PRACTICALITY

Whatever your leisure pursuits may be, the CUPRA Terramar adapts to your needs with flexible rear seats that are slide adjustable to extend the already spacious boot, and also fold in a 40:20:40 layout, providing maximum choice in how you get your latest DIY purchase home.

Overseas VZ model shown with Deep Burgundy interior

GO TRIBAL

Late 2026 sees the introduction of the VZ Tribe Edition, made for those who want that extra splash of exclusivity and head-turning distinction.

Sharing the drivetrain of the 195kW AWD Terramar VZ and available in very limited numbers, the Tribe Edition adds unique attributes providing a healthy dose of rebellious character with a sustainable twist.

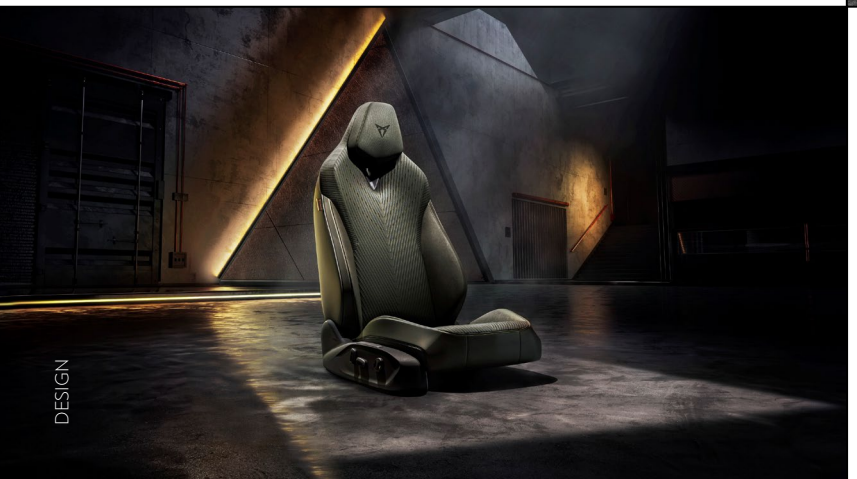

TRIBE GREEN

For those born to stand out, the optional Tribe Green Package gains a black and sulfur accented 20" wheel design and is available exclusively in a new Manganese Green Matte exterior colour.

TRIBE BLACK

The Tribe Black Edition brings forth a stealthy new 20" wheel design and dark chrome badging, and is available exclusively in the Midnight Black exterior colour.

SULFUR GREEN THEMED INTERIOR

Seats are adorned with a sulfur green hue and distinctive knitted fabric through the centres which is made from 100% recycled materials and assembled in a unique 3D process that minimises waste.
Other areas also receive the tribal green treatment including the dash, centre console and armrests, and are complimented by accents of dark chrome and metallic sulfur green throughout the cabin.

GO TO MODELS

Overseas VZ Tribe models shown

POWER

A new form of power is set free. From calm to ferocious, the Terramar transforms power into unforgettable journeys. The aerodynamic design cuts through the air, adding speed and stability. Inside, the cockpit is a command centre for innovation and technology. The suspension delivers a sporty response, while the brakes provide precise control. Every component, from the wheels to the digital display, embody this relentless energy.

This power became the essence of Terramar, making it a symbol of victory.

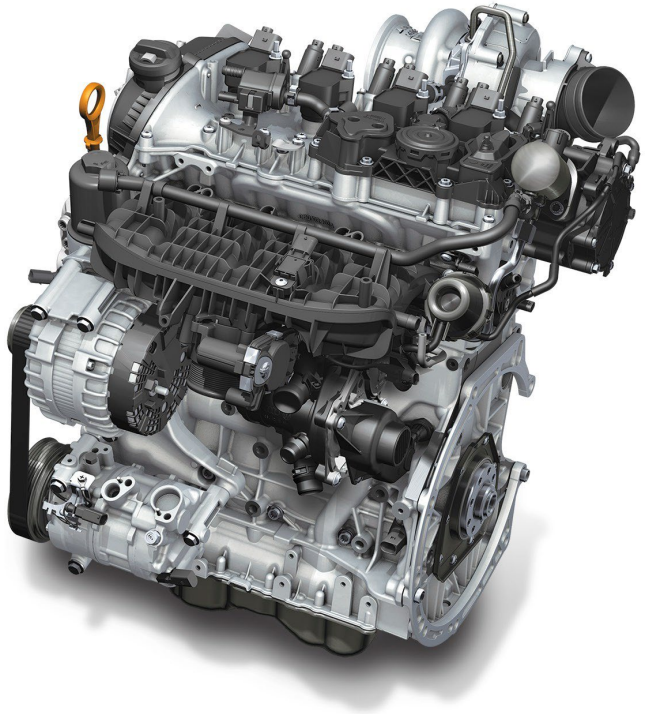

VZ model shown in Dark Void with optional Sunroof & Performance Brakes Package

DRIVETRAINS

TERRAMAR V & VZ

The CUPRA Terramar V and VZ are powered by our 2.0L turbo petrol engine family with the V receiving the 150kW tune, while the VZ variant receives the higher 195kW state of tune.

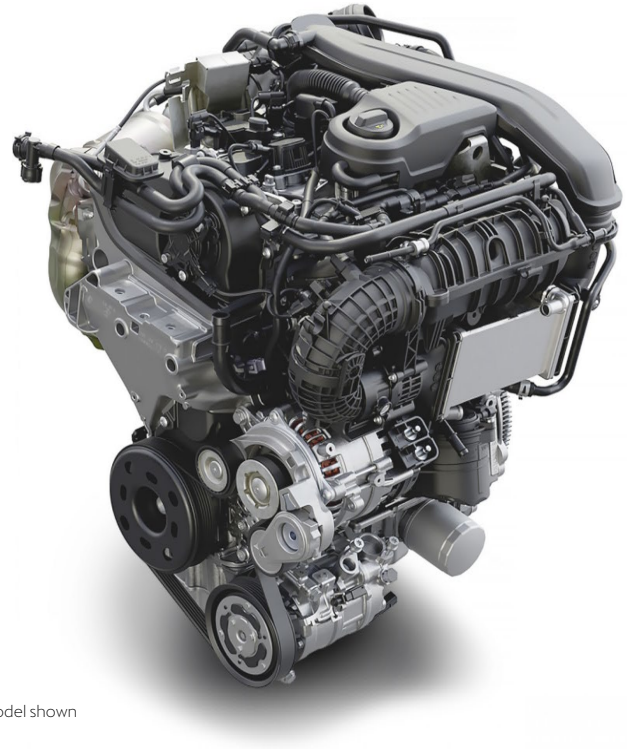

Both variants are mated to a 7-speed dual-clutch direct shift automatic gearbox and can drive power to all corners through the 4Drive all wheel drive system.

TERRAMAR S

The CUPRA Terramar S is our first Australian CUPRA introduced with mild hybrid (MHEV) technology, combining a 1.5L turbo petrol engine with a 48-volt electric system to produce 110kW of power.

The mild hybrid system supports coasting with the engine off, energy regeneration when braking, and additional power during initial acceleration which improves off-the-line performance whilst decreasing fuel consumption, especially in city and suburban areas.

Prototype model shown

GAME THE SYSTEM WITH CUPRA GEN2 PLUG-IN HYBRID

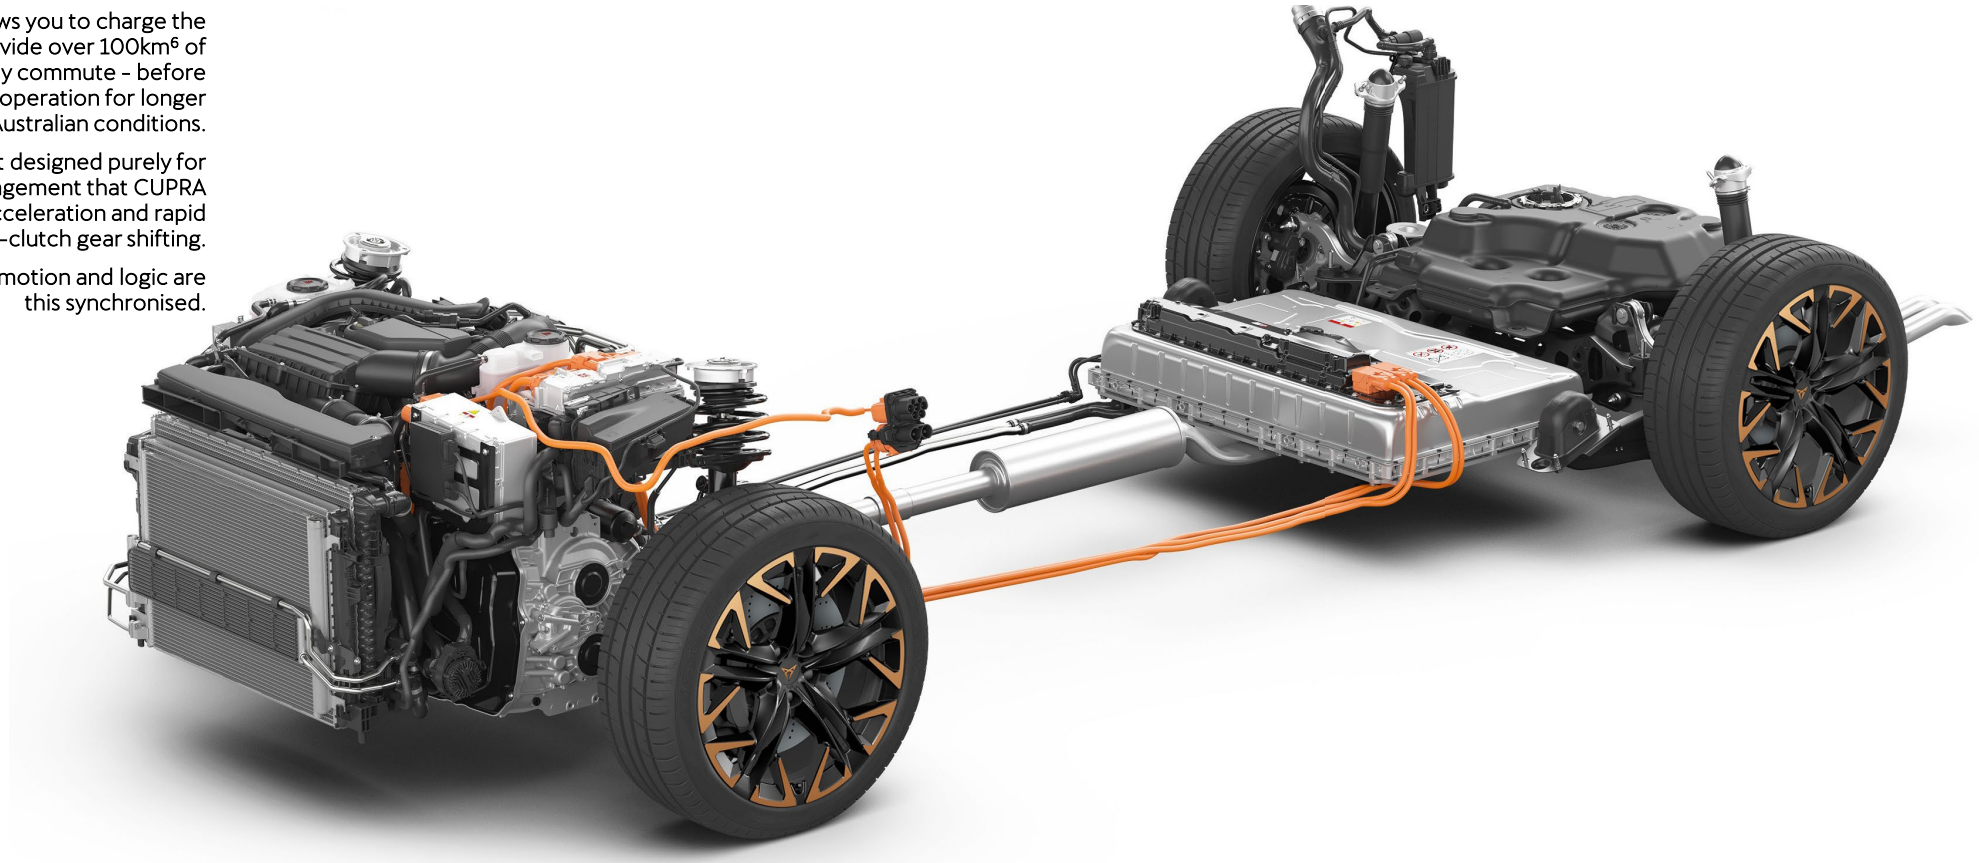

The CUPRA Terramar VZe was one of the first Australian CUPRAs to be fitted with our latest generation plug-in hybrid (PHEV) technology with significant performance and capability improvements.

The 1.5L turbo petrol engine is mated with an electric motor and a hybrid battery to provide traditional hybrid benefits – additional electric power to get you moving faster and with far less fuel use.

Then go further; the plug-in technology allows you to charge the battery at home or on-the-go to provide over 100km[6] of electric-only range - perfect for your daily commute - before switching back to traditional hybrid operation for longer weekend wanderings, ideal for Australian conditions.

And in true CUPRA style this drivetrain is not designed purely for frugality, but retains the emotive driver engagement that CUPRA is famed for including turbo-charged acceleration and rapid dual-clutch gear shifting.

It's a rare moment indeed when emotion and logic are this synchronised.

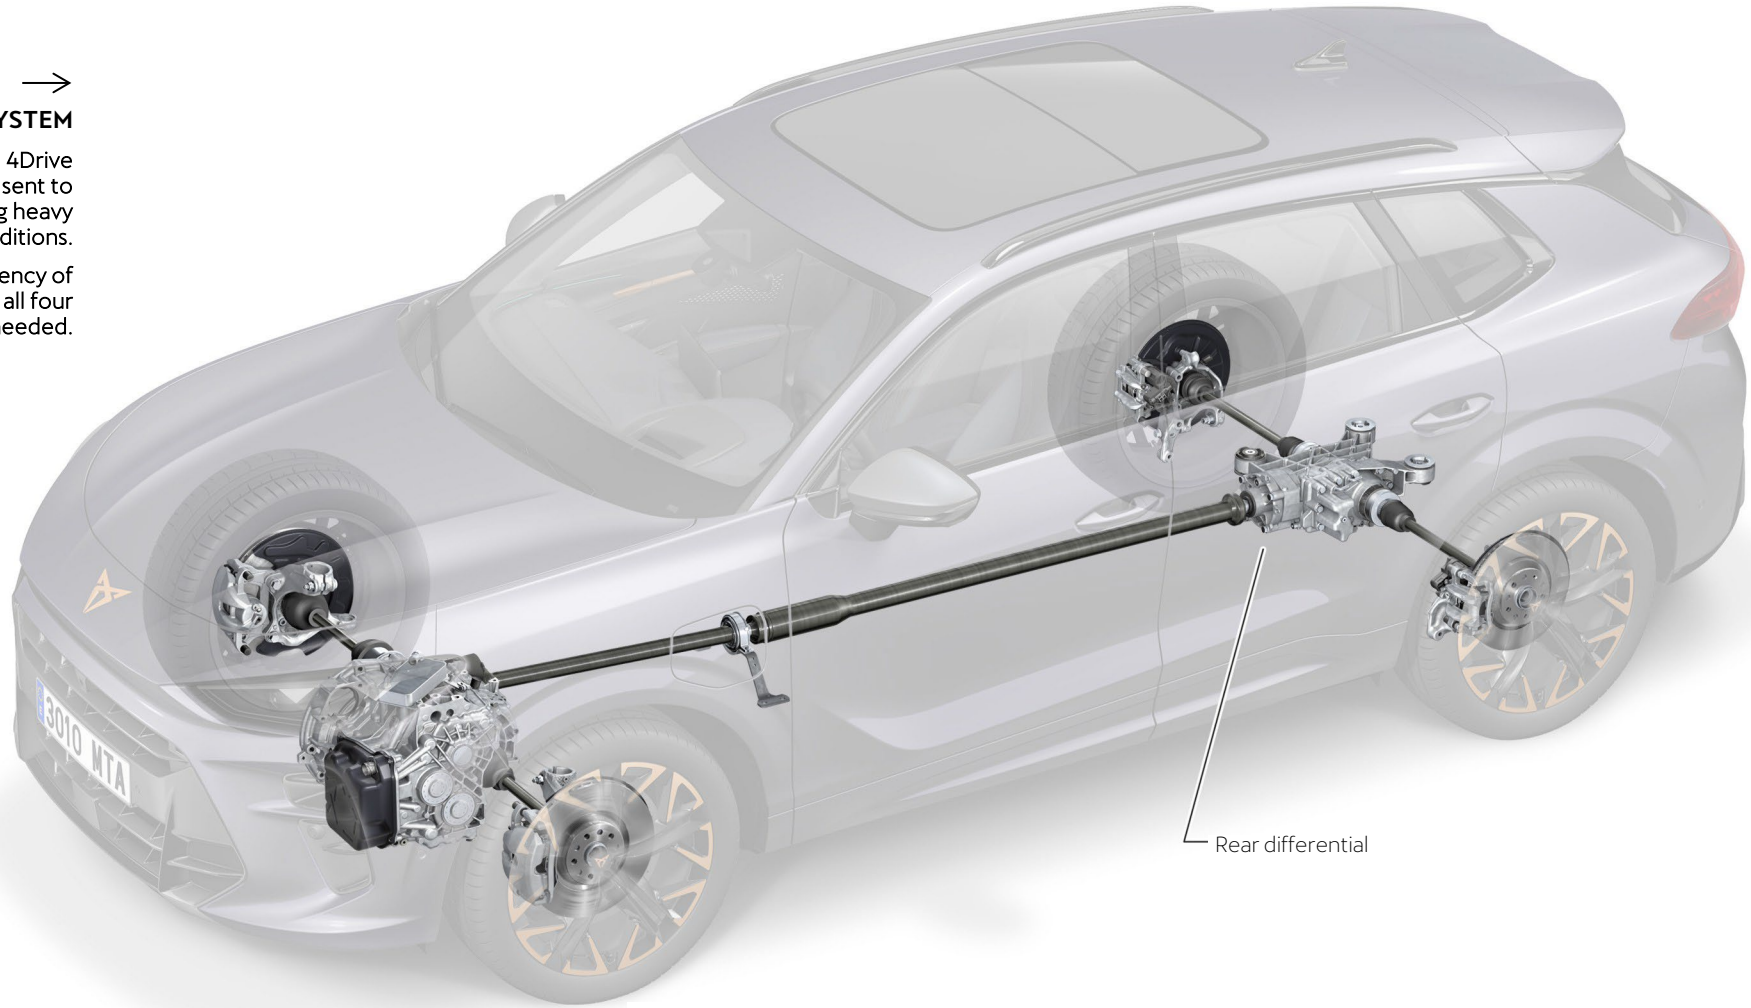

Prototype VZe model shown for illustrative purposes only

4DRIVE AWD SYSTEM

CUPRA Terramar V and VZ variants feature our proven 4Drive part-time all wheel drive system, where power is primarily sent to the front wheels, with the rear wheels engaged during heavy acceleration or slippery conditions.

This provides the best of both worlds – the efficiency of two-wheel drive for everyday driving, and the grip of all four wheels when needed.

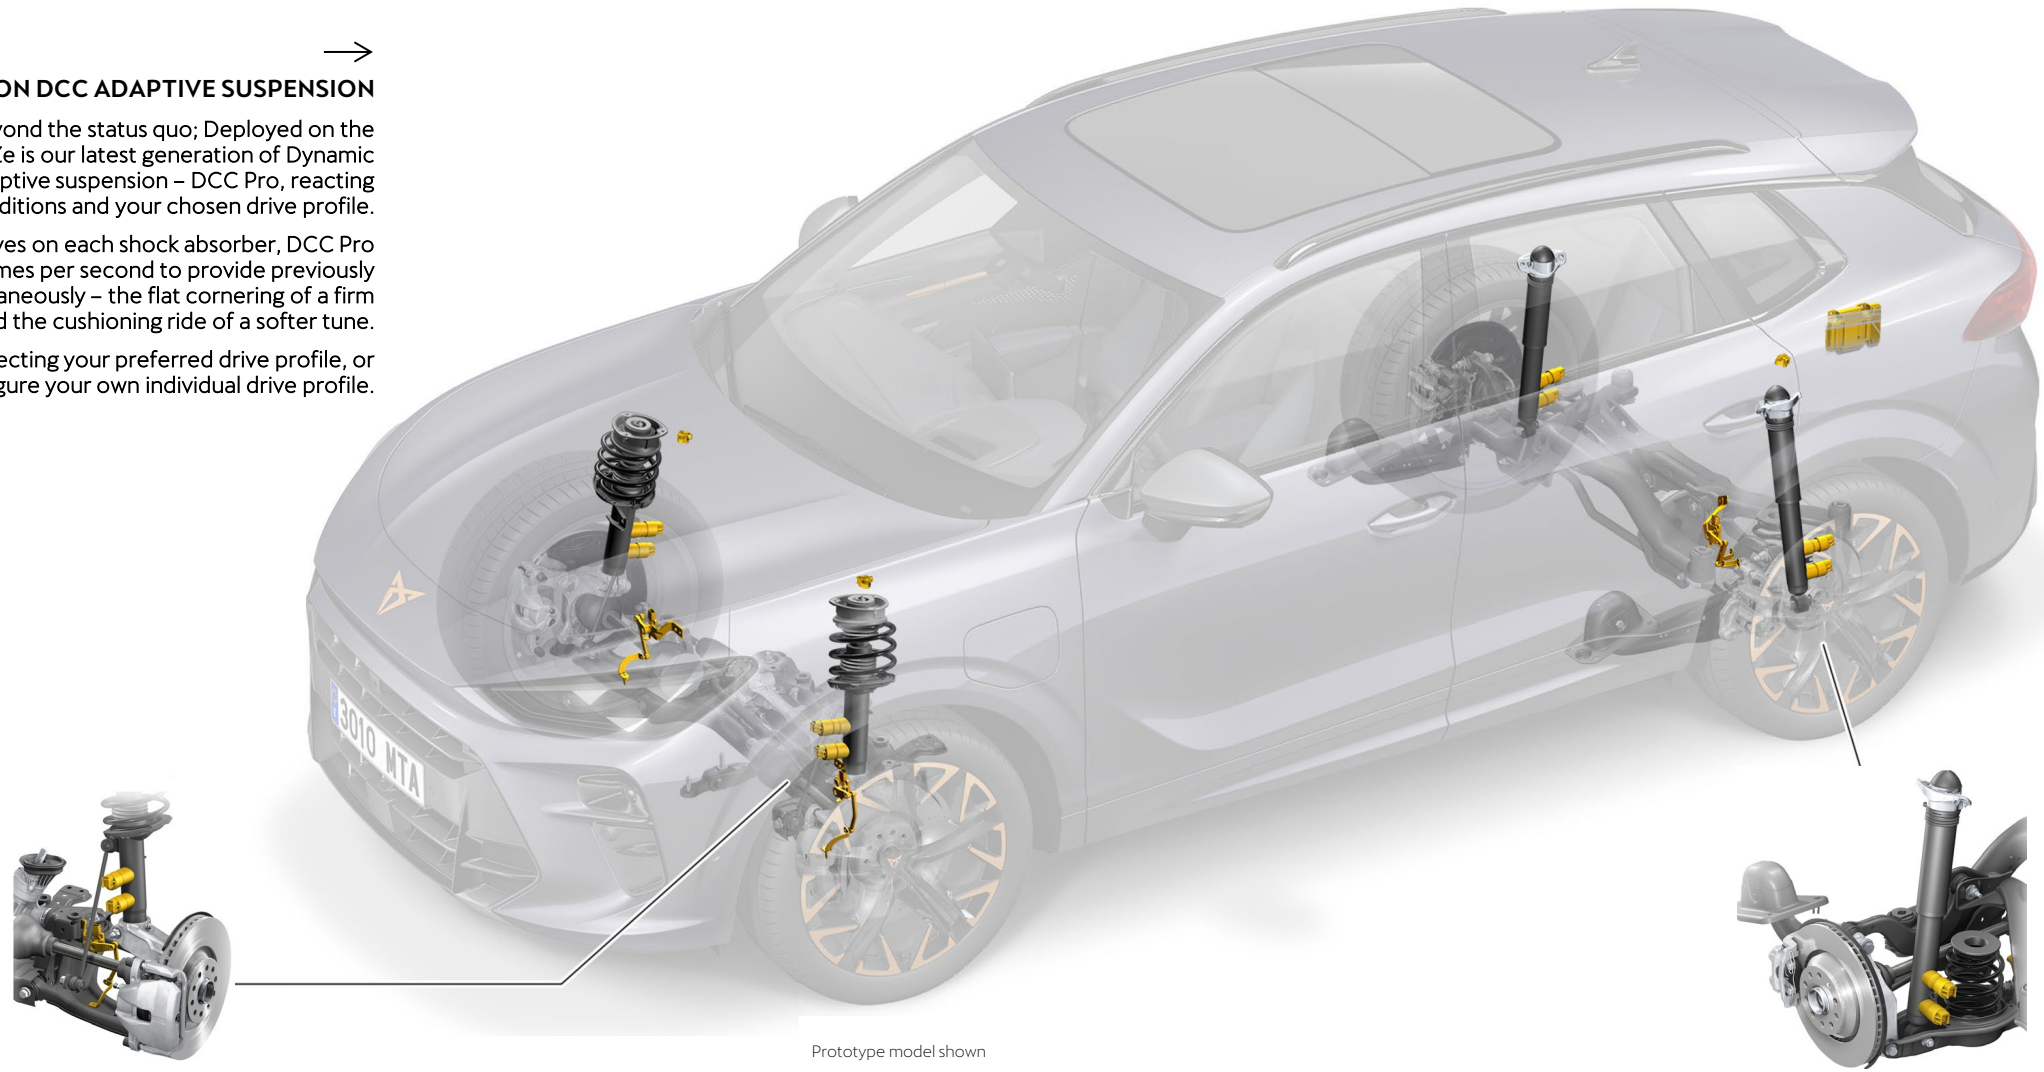

Prototype VZ model shown

LATEST GENERATION DCC ADAPTIVE SUSPENSION

Transform your journey beyond the status quo; Deployed on the CUPRA Terramar VZ and VZe is our latest generation of Dynamic Chassis Control (DCC) adaptive suspension – DCC Pro, reacting intuitively in response to road conditions and your chosen drive profile.

Now enhanced with two valves on each shock absorber, DCC Pro seamlessly adjusts up to 1,000 times per second to provide previously conflicting benefits simultaneously – the flat cornering of a firm sporting suspension setup and the cushioning ride of a softer tune.

Customise the response by selecting your preferred drive profile, or configure your own individual drive profile.

Prototype model shown

TECH & SAFETY

Our spirit of innovation was forged in times when ideas were scarce and resources limited. We committed to never settle, letting our creativity lead the way. We embraced groundbreaking solutions, turning challenges into triumphs.

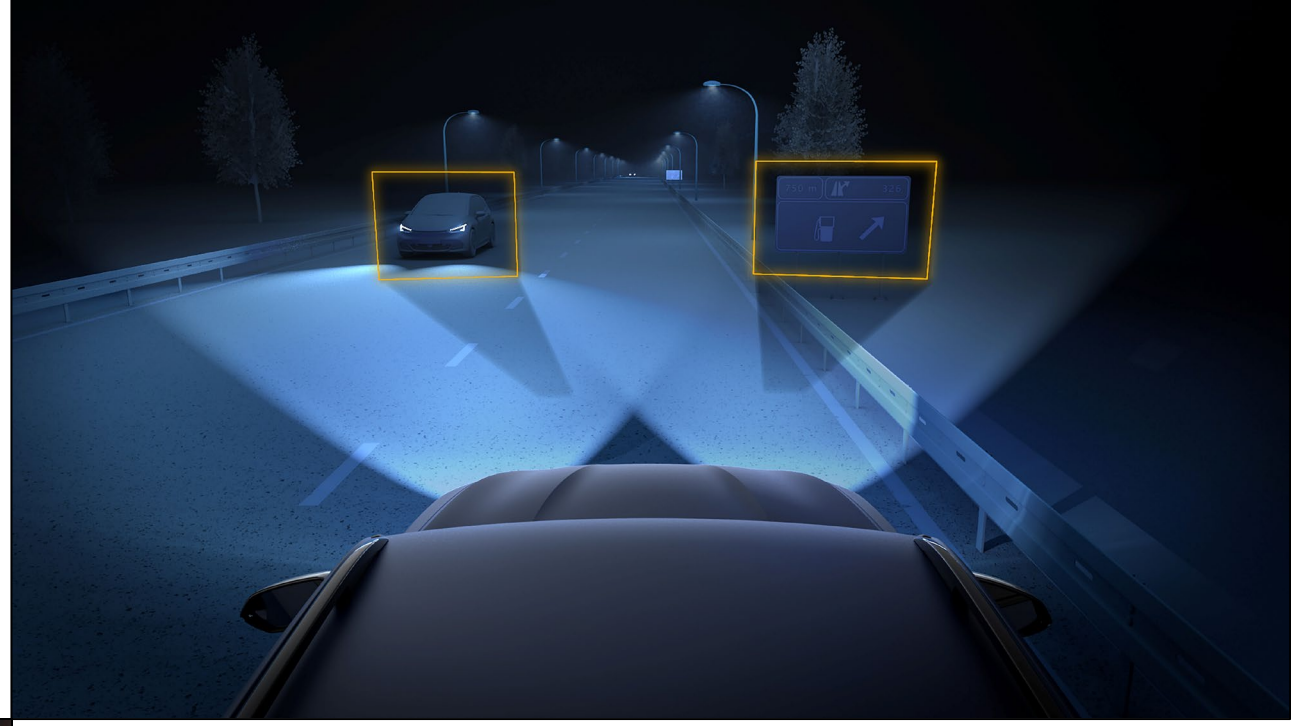

Innovation wasn't merely a choice; it was crucial. This relentless pursuit of excellence led us to the CUPRA Terramar, a vehicle that sets new standards and redefines expectations.

We believe that true greatness is achieved not by following, but by leading with ingenuity and vision. This is the spirit of innovation.

This is CUPRA.

Overseas VZ model shown with Deep Burgundy interior

TECHNOLOGY

ENTER THE MATRIX

Debuting for CUPRA on the Terramar VZ and VZe, latest generation Matrix LED Ultra headlights provide insightful vision.

This adaptive headlight technology features 25,000 individual pixels broken into 12 segments, each with separate control to minimise glare to other drivers when using the high beam, whilst simultaneously enhancing visibility[11]. Additionally, key safety information can be projected onto the road ahead including lane information, plus the CUPRA word mark as you finish your drive.

PILOTS WANTED

Standard on all CUPRA Terramar variants; Remain focused on the road with CUPRA's cutting-edge head-up display projecting essential information onto the windshield – current speed, navigation, alerts and speed limits all directly in your line of sight.

Overseas models shown

LATEST GENERATION INFOTAINMENT

The CUPRA Terramar is our second vehicle to receive our latest generation infotainment system, spread across a 12.9" touchscreen with separate illuminated controls for temperature and volume.

The crisp, high-definition screen is your portal to functions like navigation, 3-zone climate control, drive profiles, ambient lighting, self-parking and vehicle settings, and compliments the 10.25" customisable digital cockpit instrumentation.

SENNHEISER PREMIUM AUDIO

Each CUPRA Terramar comes equipped with a 9-speaker sound system including selectable sound stages and adjustable equaliser.

Terramar VZ and VZe (and optional on Terramar S and V) step up to reveal our partnership with renown audio experts Sennheiser, equipping an additional 3 speakers (including a boot-mounted subwoofer), 390-watt amplifier and Sennheiser-crafted immersion software to faithfully re-create your favourite soundscape and transform Terramar's interior into anything from a pumping club to an exquisite concert hall.

Overseas Terramar VZ model shown

SAFETY

FULL SUITE

CUPRA is fully committed to your wellbeing, that's why the suite of safety and driver-assist systems[11] in the CUPRA Terramar is as long as your arm, plus someone else's arm too.

A small sample of these include adaptive cruise control, travel assist lane centring, front assist collision warning, speed sign recognition, lane safety, blind spot monitoring and seven airbags.[11]

PARKING MADE EASY

Be a master parker in your CUPRA Terramar thanks to four cameras providing a 360° view of your surroundings, while dynamic parking lines, parking sonar and intelligent self-parking make even the worst shopping centre car park much less of a hassle[11].

UPHOLSTERIES

TERRAMAR VZ & VZe: Deep Burgundy leather appointed[7]

Anything but ordinary, the CUPRA Terramar VZ is finished with a sensual Deep Burgundy leather appointed seat trim* with complimentary burgundy flourishes around the centre console, doors and dash.
Also available as an option on Terramar S and V as part of the Leather & Sound Package.

TERRAMAR VZ Tribe: 3D knitted green-themed fabric

Unique to the Tribe Editions is this head-turning green-themed fabric interior with seat centres made from 100% recycled materials and an advanced 3D knitting process that reduces waste.
Other areas also receive the sulfur green treatment including the dash, centre console and armrests, and are complimented by accents of dark chrome and sulfur green throughout the cabin.

TERRAMAR S and V: Soul Black Dinamica

Not to be confused with anything run of the mill, the CUPRA Terramar S and V feature intricately patterned Dinamica trim through the seat centre with near-black colouring reminiscent of moonlight.
The Dinamica microfibre is made up of 73% recycled materials and embossed CUPRA emblems on the headrests make a bold impression.

The reproduction process does not allow for exact reproduction of the exterior or the upholstery colours.
Please contact your CUPRA Agent for further information on colours and upholstery combinations. Overseas models shown.

TECHNICAL

Immerse yourself in precision engineering with the CUPRA Terramar technical specifications.

Every detail demonstrates our commitment to quality, harmonising efficiency and power; crafting technology to ensure a connection to the road that is both mechanical and emotional.

From the finely tuned suspension to the advanced braking systems, every component is engineered to deliver an irrepressible smile.

NOTES

[3] The figures stated are for the purposes of comparison amongst vehicles tested under the same testing procedures only. The actual figure may vary depending on multiple factors such as fuel quality, vehicle load, environmental and road conditions.
[4] Towing capacity figures are maximum figures and actual towing capacity depends on factors including the laden mass of the vehicle, driving conditions and fitment of any accessories. Volkswagen Group Australia does not endorse or will not be held liable for any claim, loss or damage arising from the use or fitment of electronic trailer brakes.
[5] Fuel consumption figures according to Australia Design Rule (ADR) 81/02 derived from laboratory testing. Factors including but not limited to driving style, road and traffic conditions, environmental influences, vehicle condition, and accessories fitted, will in practice in the real-world lead to figures, which generally differ, from those advertised. Advertised figures are meant for comparison amongst vehicles only.
[6] Range and energy consumption figures according to ADR 81/02 derived from WLTP testing. Factors including but not limited to driving style, road and traffic conditions, environmental influences, vehicle condition and accessories fitted, will in practice in the real-world lead to figures which generally differ from those advertised. Advertised figures are meant for comparison amongst vehicles only.
[7] Leather appointed seats have a combination of genuine and artificial leather, but are not wholly leather.
[8] Compatibility will vary by device.
[9] App-Connect featuring wireless Apple CarPlay® and wireless Android Auto™ is compatible with the latest versions of iOS and Android. Active data service required.
[10] The Bluetooth® word mark and logo is a registered trademark owned by Bluetooth SIG, Inc. Any use of such marks is under licence. Not all devices will be compatible and functionality will vary depending on the device.
[11] Safety / Driver assist technologies are designed to assist the driver but should not be used as a substitute for safe driving practices.

CUPRA is committed to a policy of continuous product development and reserves the right to make changes to specifications, colours and prices without notice. The information in this brochure can therefore be given as guidance only. While CUPRA makes every effort to ensure that specifications are accurate at the time of publication, you should always check with your authorised CUPRA Partner for the latest information. Due to limitations of the reproduction process the colours displayed in this brochure may vary slightly from the actual paint and material colour.
